Primary Care Review

The latest news, views, and announcements from Michigan Multipayer Initiatives

March-April 2025

> *Michigan Multipayer Initiatives (MMI) convenes payers, practices, Physician Organizations, and community stakeholders to transform primary care and improve care value, equity, quality, and patient experience in Michigan. To be added to our distribution list, send an email with "Add Me to Newsletter Distribution " in the subject line to multipayerprimcare@med.umich.edu. Our website is at https://mimultipayerinitiatives.org/. To share an idea or ask a question, please contact Diane Marriott (dbechel@umich.edu or 734 740 0511).*

MAKING SENSE OF CHANGES AT THE FEDERAL LEVEL

Every four years when administrations change, programs and policies are apt to change as well to anchor the priorities of the new administration. Of late though, the sheer number of executive orders and new agency pronouncements make it difficult to understand the moving pieces and implications. It is tempting to get lost in conjecture and opinion pieces. In this edition, we aim to stick to the facts with a population health and primary care lens in mind.

New Directions at the Center for Medicare and Medicaid Innovation (CMMI)

CMMI's purpose is to serve as an innovation lab for promising new ways to use to test new payment and service delivery models. CMMI models are intended to improve care quality, lower cost, and promote patient-centered practices. With new administrations, we can expect to see new demonstrations introduced and expect to see announcements in the coming months.

CMS has assessed the current models and announced in a March 12th memo that several will end earlier than originally planned. This includes the Primary Care First (PCF) demonstration. PCF was a five-year model and included an innovative primary care hybrid payment design alongside a set of expectations for participating practices. There are two cohorts of practices in the model – one that began in 2021 and the other that began in 2022.

Of the 145 Michigan PCF practices, many began participating in 2021 and would have completed the demonstration by year's end anyway. As per the March 12th memo, now both cohorts will now complete their PCF participation by the end of this year. PCF practices will receive additional details from CMS with "timelines, technical assistance and other information regarding the wind-down and close-out."

Another primary care-focused model, The Making Care Primary (MCP) demonstration, will also end early. MCP operated in eight states (Colorado, Massachusetts, Minnesota, New Jersey, New Mexico, New York, North Carolina, and Washington) and featured a shift over time toward fully prospective population-based payments.

Hearteningly, CMMI's March 12th, 2025, memo states that "Primary care remains a foundational component of the Center's strategy. The early termination of Primary Care First and Making Care Primary does not signal a retreat from the Center's support of primary care providers, but rather a need to focus on different approaches that are consistent with the CMS Innovation Center's statutory mandate and produce savings."

Interestingly, one of the additional resources listed at the end of the March 12th memo was the Advanced Primary Care Management code bundles introduced in the Physician Fee Schedule in 2025.

The Innovation Center noted in a press release about the CMMI changes that they plan to announce a new strategy focused on "preventing disease through evidence-based practices, empowering people with information to make better decisions, and driving choice and competition."

It appears that several other existing demonstration models will continue, including the Advancing All-Payer Health Equity Approaches and Development (AHEAD) Model which features global hospital budgets, primary care payment reform, and a focus on the total cost of care. AHEAD began in 2024 and will run through 2034. So far, the following areas have been selected to participate in AHEAD: Maryland, Connecticut, Hawaii, Vermont, New York (in five downstate counties: Bronx, Kings, Queens, Richmond, and Westchester) and Rhode Island.

We'll be watching as new demonstration are announced, and you can be sure when they come out that we will cover them here.

CMS Rescinds Guidance on Health-Related Social Needs (HRSN) Changes

The new Deputy Administrator and Director at the Center for Medicaid and CHIP, Drew Snyder, issued an informational bulletin on March 4th rescinding some Health-Related Social Needs (HRSN) guidance issued during the Biden Administration. The first of the two rescinded documents was named Coverage of Services and Supports to Address Health-Related Social Needs in Medicaid and the Children's Health Insurance Program and it outlined opportunities for addressing HRSN in the Medicaid and CHIP programs. The second rescinded document refined the original guidance.

As CMS assesses their path forward and evaluates policy alternatives, what is the impact on states with initiatives underway? The March 4rth 2025 bulletin notes that "CMS will consider states' applications to cover these services and supports on a case-by-case basis to determine whether they satisfy federal

requirements for approval under the applicable provisions of the Social Security Act and implementing federal regulations, without reference to the November 2023 and December 2024 informational bulletin or the HRSN Framework."

It is helpful to remember that SDoH guidance was issued under the first Trump Administration and that this document is still active. This guidance aimed to "describe opportunities under Medicaid and CHIP to better address social determinants of health (SDOH) and to support states with designing programs, benefits, and services that can more effectively improve population health, reduce disability, and lower overall health care costs in the Medicaid and CHIP programs by addressing SDOH."

In the last ten years, the quality and quantity of literature assessing SDoH and HRSN interventions has grown. Additionally, the transition from fee for service (FFS) to value-based care has become more imperative. This makes addressing SDoH and HRSN even more pressing. We are eager to watch for the new policies as they are unveiled.

Telehealth: Extended Once Again, This Time Until September 30, 2025

Once more, at almost the last moment, legislation was passed to prevent Medicare coverage of telehealth flexibilities and the hospital at home program from expiring. Coverage was scheduled to end on March 31, 2024, but on March 15th, the President signed H.R.1968, the Full-Year Continuing Appropriations and Extensions Act of 2025.   This action extends funding for many programs and permits continuing operations until the end of the fiscal year on September 30, 2025.

The continuing resolution extends many of the telehealth flexibilities that came were enacted at the start of the pandemic such as the originating site for Medicare telehealth providers and Medicare beneficiaries, removal of geographic requirements and expanded originating sites for telehealth services; expanded practitioners eligible to furnish telehealth services; and extended telehealth services for federally qualified health centers (FQHCs) and rural health clinics (RHCs). The resolution also delays the in-person requirements under Medicare for mental health services furnish through telehealth, including at rural health clinics and federally qualified health centers.

THE TRAINING CORNER

To better serve you, we have expanded the array of care management and team-based training sessions. We are fortunate to have MiCMT, Mi-CCSI, MiCHWA, IHP, PTI and our newest addition Health Net of West Michigan to provide expert training on important topics in primary care. Here is a summary of their upcoming training sessions.

Michigan Institute for Care Management and Transformation

Michigan Institute for Care Management and Transformation (MICMT)

The new PDCM Billing course "Actualizing PDCM and PH CM Billing and Coding to Promote Team-Based Care" is available. For details and registration: https://micmt-cares.org/training/billing-coding Please be sure to check MICMT's event calendar to view a list of upcoming trainings, including live webinars or at a glance view please find the event calendars and event flyers in the "news" section here. For questions and concerns please Submit a Ticket | Michigan Institute for Care Management and Transformation (micmt-cares.org)

Webinar Highlights

Wednesday, March 20th at 12 pm – 1 pm
Doulas and Disparities: Supporting Pregnant People and Addressing Racial Inequities in Maternal Health
This session will highlight the physical, emotional, and informational support doulas provide, both in and out of hospital settings.
Register Now

Please be sure to check MICMT's event calendar to view a list of upcoming trainings, including live webinars or at a glance view please find the event calendars and event flyers in the "news" section here. For questions and concerns please Submit a Ticket | Michigan Institute for Care Management and Transformation (micmt-cares.org)

Michigan Center for Clinical Systems Improvement (Mi-CCSI)

November Training Update

Mi-CCSI continues to provide an array of training to support physician organizations and practices. Please visit our website to learn more about our organization and trainings at https://www.miccsi.org/about/.

MI-CCSI has expanded on-demand training topics to address the challenges of taking on legacy patients with the condition of chronic pain and substance use disorders. With the closing of a major pain management clinic, many patients are finding themselves uncertain of where to go for continued services. Additionally, primary care providers are challenged with managing this complex population.

In this on-demand webinar, Eva Quirion, an experienced practitioner, using a case study, provides practical advice for managing this complex population.

Caring for Legacy Patients (https://www.miccsi.org/training_event/caring-for-legacy-patients/)

This learning activity will utilize case studies to review treatment options and medical management considerations for chronic pain legacy patients (a patient whose care is taken over by a physician after treatment was initiated by another physician). This activity will include risk management for legacy prescriptions, (prescribing that continued beyond the usual length of time and are not discontinued after the usual recommended period) affiliated with chronic pain management.

Total time: 50 minutes

Objectives:

1. Define what is meant by legacy patients and legacy prescribing

2. Determine risks and benefits of maintaining previous plans of care versus making changes to plans of care

3. Identify situations where involuntary tapering may be appropriate.

EVA Quirion, FNP-C, PhD

Eva Quirion is a nurse practitioner specializing in the treatment of pain and substance use disorder. She works closely with patients and primary care providers to improve patient safety related to opioids. She is a member of the Maine Quality Counts Chronic Pain Collaborative, Penobscot Community Healthcare Controlled Substance Committee and Chair of the St. Joseph Bangor Controlled Substance Review Group.

Practice Transformation Institute (PTI)

Continuing Medical Education (CME) Opportunities: Advancing the Patient Experience of Care

This six-part series is designed to identify and develop the skills essential for providing a positive patient experience of care within the clinical setting. A patient's experience is enhanced through effective communication, obtaining patient feedback, interacting with diverse generations, using the spirit of motivational interviewing (MI) and MI tools, and furthering cultural competency and humility. Using survey data results obtained in determining areas for quality improvement in the patient experience of care will be explored. Each activity may be taken separately; however, the greatest benefit will be realized by attending the entire series.

Part One: The Impact of Effective Communication on the Patient Experience of Care – *January 22, 2025 - past*
Part Two: Patient Care Experience Using Multi-Generational Approach – *February 26, 2025 - past*
Part Three: Using the Spirit of Motivational Interviewing (MI) in Creating a Positive Patient Experience – *March 26, 2025*
Part Four: The Importance of Using Motivational Interviewing (MI) Tools in Creating a Positive Patient Experience – *April 23, 2025*
Part Five: Creating an Environment Supportive of Multiple Cultures *– May 28, 2025*
Part Six: Using Data to Create Excellence in the Patient's Experience of Care – *June 25, 2025*

Statement of Accreditation
The Practice Transformation Institute is accredited by Michigan State Medical Society to provide continuing medical education for physicians.
AMA Credit Designation Statement
Practice Transformation Institute designates this live course for a maximum of 1.5 *AMA PRA Category 1 Credit(s)*™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Full details, information, and registration: https://transformcoach.org/learning-solutions/advancing-the-patient-experience-of-care-series/

Community Health Worker Program Opportunities
About the program:
Practice Transformation Institute (PTI) is an approved entity by the Michigan Department of Health and Human Services (MDHHS) to provide training for individuals seeing CHW certification. We are the only CHW program in Michigan that is accredited by the International Accreditors for Continuing Education and Training (IACET) and able to award CEUs for each activity. PTI's program includes a robust curriculum of 103 hours of virtual classroom learning that meets the requirement of the National C3 Council. Topics

include communication, motivational interviewing, action planning, social determinants of health, community resources, chronic conditions, healthy lifestyles, health promotion and disease prevention, and more.

A Spring Virtual class is currently taking place. **To learn more about upcoming CHW opportunities visit:** https://transformcoach.org/learning-solutions/community-health-worker-chw-program/

Community Health Worker Sustainability Program
CHWs are an essential part of a health care, social services, or community-based organization team. They bring knowledge and skills that enhance the quality and experience of their patients'/clients' care. How are they best integrated into those teams? What sources are available to reimburse the services they provide to sustain their role within an organization or provider practice?

This new two-part program will:
- Identify services for which a CHW can bill, along with the payer enrollment process
- Explain the link between ICD-10-CM codes and reporting health conditions
- Discuss how ICD-10-CM Z codes are used to pinpoint social determinants of health (SDOH)
- Clarify the documentation needed to bill for CHW services
- Identify billing codes approved for CHW payment by the primary payers in Michigan

This live virtual program will be in two parts on May 7 and May 14, 2025, from 8:00 AM – 12:00 PM. PTI is authorized by IACET to offer 0.8 CEUs for this program after completion.

Introduction to Team Based Care
About this course:

The Introduction to Team-Based Care course helps the learner better understand how to work in a multidisciplinary care team and in collaboration with the patient. Open to all members of the practice to gain foundational knowledge in Team-Based Care. For additional details, please visit https://transformcoach.org/learning-solutions/micmt-trainings/

Course Date and Time: (Live Virtual)
Wednesday, May 21, 2025 8:00am-4:00pm
Introduction to Team-Based Care

Wednesday, August 20, 2025 8:00am-4:00pm
Introduction to Team-Based Care

Patient Engagement Foundations

About the course:
The goal of this course is for all Care Team Members to learn engagement tools/skills in order to have productive conversations with patients about their health including basic motivational interviewing skills.

The Care Team Member will build upon this foundation, to utilize patient engagement skills in different situations such as Medication Assisted Treatment, (MAT) and Palliative Care.

It is strongly recommended to take Introduction to Team Based Care before taking this course.
For additional details, please visit https://transformcoach.org/learning-solutions/micmt-trainings/

Course Date and Time: (Live Virtual)

Monday, September 4, 2025 8:30am-4:30pm
Patient Engagement Foundations

Health Net of West Michigan provides facilitated training and curriculum packages that engage learners with practical expertise so that participants can apply session concepts and skills in their everyday work and advance in their skillsets and careers. Two training programs are available and are approved for **continuing education** for community health workers (MiCHWA-approved) and social workers (NASW-MI approved).

- The Care Model© Training Series develops core skills for frontline health and social service navigators to increase client engagement and community well-being through equitable access to resources. The series consists of seven topics chosen to address core competencies needed by frontline professionals, including:
  - Empowerment Approach & Skills
  - Professional Boundaries
  - Health Equity 101
  - Best Practices for Working with Interpreters
  - Personal Interview & Client Action Plan
  - Strengths-Based Documentation
  - Community Resource Navigation

- Facilitated Supervisor Training is a peer-supported cohort that guides participants in developing their leadership approach, competencies, and confidence for supervision. Participants attain a toolbox of practical leadership skills that will guide them in their journey. Investment in supervision competencies is a key component to effective service delivery and staff engagement and retention. Supervisor training topics include:
  - Developing Your Supervision Approach
  - Giving & Receiving Feedback
  - Documentation of Supervision
  - Cross-Cultural Supervision
  - Secondary Traumatic Stress & Burnout
  - Self-Care for Supervisors
  - Conflict Resolution/Mediation
  - Group Dynamics
  - Meeting Facilitation
  - Accountability & Delegation

- Health Net is available to bring training to your organization or community. Please reach out to Christina Pavlak, Vice President of Training & Development, about your training needs.

Integrated Health Partners (IHP)

IHP offers Introduction to Team Based Care and Patient Engagement Foundations trainings throughout the calendar year. All 2025 training dates are available for registration through the registration link below.

Trainings	*Upcoming Dates*	*Registration Link*
Introduction to Team Based Care	4/29/25 *Additional dates available within registration link*	**Register here**
Patient Engagement Foundations	4/22/25 *Additional dates available within registration link*	**Register here**

If you have any questions, please reach out to Allisyn Rainwater at rainwatera@integratedhealthpartners.net or call (269) 425-7110.

Michigan Center for Clinical Systems Improvement (Mi-CCSI)

Mi-CCSI continues to provide an array of training to support physician organizations and practices. Please visit our website to learn more about our organization and trainings at https://www.miccsi.org/about/.

Training Date	Name	Description	More Details
April 8 May 13 June 10	Serious Illness	Live ZOOM training to address having a serious illness conversation. The training builds on the behavioral, medical and social needs to consider in the comprehensive assessment for an individual with a serious illness diagnosis. After review and practice, the attendee will complete a serious illness conversation with a trained patient in a simulated environment. After the simulation, the attendee completes a self-evaluation and has a review with a professional evaluator.	https://www.miccsi.org/training_event/palliative-care-training/

		Highly recommended for licensed care team members working with individuals with serious illness such as COPD, renal insufficiency, and untreatable cancer.	
April 16 May 21 June 12	Team-Based Care	Live ZOOM training to review introductory concepts of the team-based care model. This training is an approved training course through MICMT that meets the billing requirements for BCBSM and Priority Health.	https://www.miccsi.org/training_event/tbc-training/
April 17 May 22 June 13	Self-Management Support: Patient Engagement	Live ZOOM training to review the core concepts of self-management and patient engagement. This training, available on the MICMT website as an external training, is eligible for training cost compensation as an approved training. The training empowers the attendee to support the Self-Management Capabilities outlined in the BCBSM PCMH N-Interpretive Guideline. It guides team members in identifying key communication skills of motivational interviewing to engage the patient, create a patient-centered self-management plan, and identify potential barriers to better understand patient challenges. To enhance the learner experience, the training provides many interactive activities and simulation with a trained patient to create an effective self-management plan. This training receives high scores from attendees and is highly recommended for team members working with patients to develop self-management skills and abilities.	https://www.miccsi.org/training_event/engagement-training/
April 1 May 6 June 3	NEW: Billing and Coding Actualizing PDCM and PH CM Billing and Coding to Promote Team Based Care	This training provides the foundation of the BCBSM/BCN PDCM billing codes and Priority Health care management codes. It includes practical application demonstrations and activities to promote confidence in using the codes. Team members who will be using the PDCM, Priority Health CM codes are encouraged to attend this training after they have completed the Team-Based Care Training. The training is a blended training or self-directed prework and in-person ZOOM training to demonstrate the use of the codes use case studies, followed by reverse training to apply the use of the codes using a case study. This is highly recommended of all team members that will be using the PDCM and Priority Health CM codes.	https://www.miccsi.org/training_event/billing-coding-training/
April 18 June 6 September 5	**NEW: Pain & Substance Use Disorder Treatment Part 1: Biomedical & Psychosocial Aspects of Pain**	During Part 1 of this two-part live virtual training course, the participant will gain skills and knowledge in the most current evidence-based approaches of pain management including an overview of pain mechanisms, biopsychosocial interventions, and the use of cannabinoids. The integrity, commitment, and expertise of this nationally accredited faculty will empower the provider and clinical team with current knowledge, practical approaches and applicable tools and resources to manage this vulnerable and often very complex population. **Participants may choose to participate in one or both parts of this live training series** At the conclusion of Part 1, the participant will be able to:	https://www.miccsi.org/training_event/treating-pain-addiction/

		• Review current evidence on pain and pain management. • Identify the current evidence and guidance on cannabinoid use for pain management. • Review the impact of behavioral changes in managing pain. • Review non-pharmacological, self-management approaches to support patients who have chronic pain. This training is provided for FREE through a grant from the Michigan Department of Health & Human Services and the Centers for Disease Control and Prevention. Available Continuing Education: The AAFP has reviewed Pain and Substance Use Disorder, and deemed it acceptable for AAFP credit. This course has been approved by NASW-Michigan	
April 25 June 27 September 12	**NEW: Pain & Substance Use Disorder Treatment Part 2: Importance of Screening for SUD and Management of Legacy Patients**	During Part 2 of the two-part live virtual training course, the participant will be introduced to the importance of regular screening for substance and alcohol use to detect risk, the importance of early intervention when risk is identified, and when taking over pain management from other providers, the importance of effective and empathic communication including how to have crucial conversations. **Participants may choose to participate in one or both parts of this live training series** At the conclusion of Part 2, the participant will be able to: • Discuss the importance of assessing patients with chronic pain for alcohol and drug use and related disorders. • Describe how to manage patients with chronic pain with current or previous unhealthy drinking and drug use. This training is provided for FREE through a grant from the Michigan Department of Health & Human Services and the Centers for Disease Control and Prevention. Available Continuing Education: The AAFP has reviewed Pain and Substance Use Disorder, and deemed it acceptable for AAFP credit. This course has been approved by NASW-Michigan • Name at least two major principles of how to approach conversations about controlled medications. • Have increased confidence in engaging patients in difficult conversations. • Define what is meant by legacy patient and legacy prescribing.	https://www.miccsi.org/training_event/pain-substance-use-disorder-treatment-importance-of-screening-for-sud-and-management-of-legacy-patients/

Pain & Substance Use Disorder On-Demand Learning

MI-CCSI offers a diverse library of on-demand learning opportunities on various chronic pain and substance use disorder topics. Additional learning topics will be added throughout the year. Visit our website to view our library.

Cost:
These on-demand learnings are offered at no charge through a grant from the Michigan Department of Health & Human Services and the Centers for Disease Control and Prevention.

Diagnosing & Treating Chronic Pain Based on the Underlying Mechanisms

During this two part learning series, the participant will review the underlying mechanisms of chronic pain including nociceptive, neuropathic, and nociplastic pain, utilize a body map to determine the patient's mechanism(s) to develop a treatment plan for pain management.

Presenter: Daniel Clauw, MD

Learn More

Nociplastic Pain & Chronic Overlapping Pain Conditions

During this learning activity, the participant will explore nociplastic pain and chronic overlapping pain conditions. It will also review diagnostic criteria, various management strategies, and combining pharmacological and self-management techniques to improve patient outcomes.

Presenter: David Williams, PhD
